Change of default settings

(menu: Settings -> Analysis settings -> Analysis)

- The option **Generate the infringement of exceeding the 6/12x24h period between weekly rests** was enabled by default

Displaying the licence code

(menu: Help -> About)

- In the *About* tab, the information on the licence code was added with a possibility of copying

Generate the infringement of exceeding the 6/12x24h period between weekly rests

(menu: Settings -> Analysis settings -> Analysis)

- To the Generate the infringement of exceeding the 6/12x24h period between weekly rests option, the sub-options were added:
 - Generate infringements of weekly rest too short and taken after 6/12x24h period independently
 - verify 6/12x24h only between weekly rests at least 24h long
 - verify 6/12x24h taking into account weekly rests indicated as too short

Vehicle registration number

(menu: Vehicles -> Add and Edit)

- The possibility of adding the same registration number for **Vehicle**, **Trailer** and **Trailer** was added

Option of saving the time zone

(menu: Control -> New control)

- In the **New control** window, the option of saving the time zone [**Remember**] was added. When the option is enabled, the last saved time zone will be prompted while creating a new control

Time format - Sweden

(menu: Reports -> Infringements and manipulations)

- The time format in the fields **Duration** and **Norm** was changed

Analyze too short daily rests in exact 24-/30-hour periods - Guidance note 7 - Sweden

(menu: Settings -> Analysis settings -> Analysis)

- When the option **Analyze too short daily rests in exact 24-/30-hour periods - Guidance note 7** is enabled, analysing daily rests in the exact 24h periods may be finished only after the 11h daily rest in case 3 reductions to 9h were used

Driver card number - Sweden

(menu: Raporty -> Driver card insertions and withdrawals from the digital tachograph; Monthly chart (Samochód); Activities from digital tachograph; Chronological list of cards used in the tachograph; Infringements and manipulations -> Compare activities (control on the premises))

- The number of the exact driver card that was used during a given day will be displayed

Combining data from tachograph

(menu: Digital tachograph data -> Activities on a specific day)

- Combining events from a tachograph in which two different company cards were used during one day and events from two different tachographs (e.g. when a tachograph is replaced with a new one) was introduced

Compare driving time and distance on the map

(menu: Reports -> Compare driving time and distance on the map)

- The tabs **Route** and **GNSS places** were added in order to allow to compare the theoretical route from the map with the actual route according to the GNSS points
 - in the **Route analysis** section on the upper bar, the values **Route length** and **Route time** for the route according to the GNSS points were added

Speed chart

(menu: Preview window of data from the digital tachograph / smart tachograph -> Speed chart)

- A new option **Mileage chart** was added on the Speed chart; it allows to display the number of the travelled kilometres on the X-axis of the chart
 - if the option **Mileage chart** is enabled, the options **Speed chart** and **Acceleration chart** will be automatically disabled and the 0 km/h speed will not be included on the chart

Pairing a vehicle with trailers and semitrailers - France

(menu: Vehicles -> Add and Edit)

- The possibility of pairing a vehicle with max. three trailers and/or semitrailers was introduced
 - w oknie dodawania/edycji pojazdu dodano zakładkę **Connexes**, w której można powiązać pojazd z przyczepami i naczepami poprzez wybranie z listy odpowiedniego numeru rejestracyjnego lub dodanie nowej przyczepy/naczepy
 - in the window of adding/editing a vehicle, a tab **Connexex** was added, in which you can pair a vehicle with trailers and semitrailers by choosing the proper registration number from the list, or by adding a new trailer/semitrailer [**Ajouter**]

DSRC module

(menu: DSRC module)

- The sound signalling that informs about alerts was introduced

(menu: Settings -> Analysis settings -> DSRC and DSRC module -> DSRC settings)
- The option **Play alert sounds** with a possibility of choosing the type of alert that will be signalled with sound was added

Program settings

(menu: Settings -> Program settings)

- The functionality of verifying periods without data during reading the driver card and while uploading a driver card reading

- the option **show lack of driver's records notification after new data has been read** was added

Change of location of the program's configuration files

- The program's configuration files were moved from the installation folder to %**AllUsersProfile%\INELO\TachoScan Control**
