Inelo Tachoscan Control and combo reader

Dear Sir/Madam

Thank you for your assistance with the supply of the Inelo licenses, download hardware and training.

Hampshire Commercial vehicle Unit (CVU) have been piloting this equipment on behalf of the wider Roads Policing Unit covering the five counties of Hampshire, Berkshire, Buckinghamshire, Oxfordshire and the Isle of Wight.

My team have reported excellent performance of the software and reliability of the devices. They are now confident in the results of the analysis and have made representations to invest further for the rest of the roads policing team.

The training delivery by Gosia and Petre was very professional and their assistance with identification of the correct analysis settings (guidance notes) has ensured consistent application of the regulations in line with our friends in the rest of the EU.

My team are particularly happy with the manipulation warnings and highlighting features. I am more centered on the efficiency savings that the software has brought to my team. Auto population of the control form, language changes and triage of the infringements means that more time is freed up to target the worst offenders who risk the most harm.

Backup service and support has so far proved very good and quick.

Thank you for your continued support and for creating a quality product. It is good for enforcement and good for the drivers.

Yours faithfully

PS 1463 Paul Diamond
Commercial Vehicle Unit, Hampshire and Thames Valley Police
